

227 Snowmaking Guns Atop Nub's Nob

FOR IMMEDIATE RELEASE

September 2005

Harbor Springs, Michigan – While most Midwest ski and snowboard resorts are busy with golfers and convention guests, Nub's Nob, Michigan's #1 ski resort according to the Detroit News 2005 readers survey, quietly added to their powerful snowmaking system as their focus stayed on cold days to come.

Now totaling 227 snowmaking guns the Nub's Nob fleet is legendary. General Manager Jim Bartlett said simply, "We work year 'round, like very few other places, thinking only about how we can make the snow conditions better for our customers. The more snow guns the merrier."

"We developed the world's biggest snow gun right here at Nub's, too" said Jim in reference to "The Hammer" a monster snow producing gun capable of more snow per hour than any other snow gun in existence.

"Snow is our number one priority", Bartlett was quick to note "that Nub's Nob is still the *only* resort in the Midwest *ever* chosen in SKI Magazine's Top Ten Resorts in *all* of North America for *anything* and that was for our snow, grooming and value!"

"We really appreciate all the accolades from our customers, peers and the press" added Jim. "Without the best snowmaking and grooming crew in the world all these great tools would mean nothing. The fact that Nub's Nob is singled out by so many for great snow and grooming is the ultimate 'high five' to the greatest snow crew anywhere."
